Floor Maintenance

Properly maintaining hard floors, whether it's marble, wood, or terrazzo, is well worth the time and effort. The lambswool floor polishing bonnet is one of the most overlooked, yet essential tools in maintaining hard floors. Lambswool bonnets are used when the highest quality of shine is desired. This high quality shine is required in a wide variety of locations including, schools, hotels, banks, office buildings, etc.

The lambswool bonnets are used on low speed floor machines (175 – 300 rpms). Wax is applied in small amounts to the floor and spread around the floor using the floor machine. The final step requires a lambswool bonnet to dry buff the floor to bring out a high shine. Maintaining the high quality shine is as easy as rebuffering the floor periodically. Lambswool floor polishing bonnets are available in sizes ranging from 5 ½" to 24" and configurations including, pad only, with elastic skirting, or with drawstring skirting, skin back, or material back.
